

Managing, maintaining and deploying Storage can be an expensive task and take up a considerable amount of management time. With Quintica's Storage-as-a-Service solution, you can deploy massively scalable storage capabilities instantly, avoid the capital expenditure and other associated costs and free up your resource to focus on the things that matter to your Business.

With your data stored on our cloud, you can access your data from anywhere, at any time as long whilst having the peace of mind that your data is in safe hands.

Solution Architecture:

With the cost of storage continuing to come down, procuring the storage capacity ahead of the demand results in a cost per GB of the procured capacity higher than the market rate at the time it's actually consumed. With Quintica's Cloud Storage solution you only need to pay for what you use at the time that you use it and can utilize additional capacity "on demand" to meet the changing needs of your business.

The cloud computing architecture allows Quintica to offer infrastructure services on a utility, "pay-as-you-go" basis. This approach negates the need to make large (CAPEX) investments in IT infrastructure. Payment is month by month (OPEX) and for only the infrastructure you use and need.

Quintica offer a range of solutions, tailored to cater for the full range of requirements from personal storage space in the cloud to a fully outsourced enterprise SAN, combining the speed and security of a local file repository with the access, flexibility and unlimited storage capabilities of the Internet cloud.

Facilities:

Quintica's data centre facility features comprehensive physical security, UPS, emergency backup generators, and fire Suppressant systems, ensuring your data remains safe at all time. Quintica have adopted a 'Green Computing' strategy for managing the data center, giving you piece of mind that your data is not only safe but managed responsibly.

About Quintica

Quintica is a quality driven, consulting, education, technology and managed service provider. We assist companies to meet their business objectives by

understanding and bridging the gap between their defined strategy and operations.

We ensure the correct people, processes (operational & support) and technology are in place to support and deliver the key services your Organisation depends on; this is done using our proprietary methodology, the Q-Journey.

The Q-Journey is based on international standards and frameworks and is delivered through a collaborative approach to ensure the highest level of quality is maintained.

The Q-Journey focuses on helping Organisations manage their COSTS, CASH and CUSTOMERS to ensure long term business sustainability and covers the full spectrum from consulting and training to implementation and cloud computing services.

Quintica was founded in 2001 with a remit to create a classic Service Management company. In 2009, Quintica and the Eaton Group, a telecommunications infrastructure provider, saw an opportunity to extend an existing and very successful joint venture and the two companies merged.

Quintica has developed its business based on four core services; Information Technology, Business Management, Human Resources and Customer Relationship Management, each of which shares an objective to achieve and maintain global standards. Through these services we enable our clients to enhance their business, manage cash-flow, reduce their costs and attract new customers, resulting in businesses which stand head and shoulders above the competition.

To deliver our promise, we access the widest array of specialist expertise. Our approach is a collaborative and consultative one, with no pre-subscribed solution, but rather a bespoke creation deployed to suit your specific requirements based around our methodology.

Benefits

- On-demand, guaranteed availability
- Pay-as-you-go pricing models
- Improved transparency of the cost of backup services
- Strict environment controls and protection
- Free infrastructure support team
- Access anywhere, any-time
- No Capital expenditure
